Abstract

[The abstract of no more than **200 words** must be provided here. The full paper should not exceed **7,500 words**, including references, appendices and any other relevant material.

Papers exceeding the word count will not be accepted. The abstract should provide a comprehensive overview of the subject matter, explicitly highlighting the authors' contributions, including motivation and objectives, methodology, results, and significance of the work from research/policy/industry perspective.]

Keywords

Keyword 1, Keyword 2, Keyword 3, Keyword 4, Keyword 5 (*maximum 5 keywords*)

1. Introduction

Manuscripts must provide a comprehensive overview of the subject matter, explicitly highlighting the authors' contributions. This includes a detailed description of the motivation and objectives, employed methodology, the obtained results, and a concluding discussion that emphasizes the significance of the work from research/policy/industry perspective.

Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Do not use abbreviations in the title, unless they are unavoidable.

2. Literature Review

Review relevant literature and establish the theoretical foundation of your research. Identify gaps in existing knowledge that your study addresses.

3. Methodology

3.1 Research Design

Describe the overall research approach and design.

3.2 Data Collection

Provide information on materials, nature and sources of data, data collection methods.

3.3 Data Analysis

Explain the analytical methods and techniques employed.

4. Results

Present your key findings clearly and systematically. Use tables, figures, and equations as needed.

4.1 Tables and Figures

Figures should be of good quality with a minimum of 600 dpi (1 bit/sample) for line art (graphics, charts, drawings or tables) and 220 dpi for photos and gray scale images.

Ensure that tables and figures are not split across pages and that they are incorporated into the main body of the paper, positioned near the paragraph of first mention. Every table and figure must be explicitly referenced in text using the format "Figure 1" or "Table 1". They should be numbered sequentially in the order of their appearance.

Variable	Value 1	Value 2	Value 3
Data row 1	100	200	300
Data row 2	150	250	350

4.2 Equations

Equations should be centered on the page, numbered consecutively with equation numbers in parentheses, in line with the right margin.

$$f(x) = a_0 \cos \frac{\pi x}{L} \quad (1)$$

Be sure that the symbols in your equation have been defined before the equation appears or immediately following.

5. Discussion

Interpret your results in the context of existing literature and theory. Discuss implications for research, policy, and/or industry.

6. Conclusions

Summarize the main findings and contributions of your research. Discuss limitations and suggest directions for future research.

Acknowledgments

Acknowledgements should be included in a separate headed section after the main text. Authors may acknowledge in this section support for the development of the study or research, or any contribution to the work done, including sponsorship and financial support.

References

All citations should follow the **APA 7th edition style**. Citations of works by two authors should have "and" and not ampersand symbol (&). Citation by three or more authors should have the first author followed by et al.

A reference list should appear at the end of the paper under the heading "References". All references cited in the text will be listed at the end of the paper in the "references" section. All the references should be arranged in alphabetical order and in ascending chronological order for each author. The list should include only those references cited in the text. Where possible, providing the DOI of references is highly encouraged.
